

Connecting to hcwif with Android

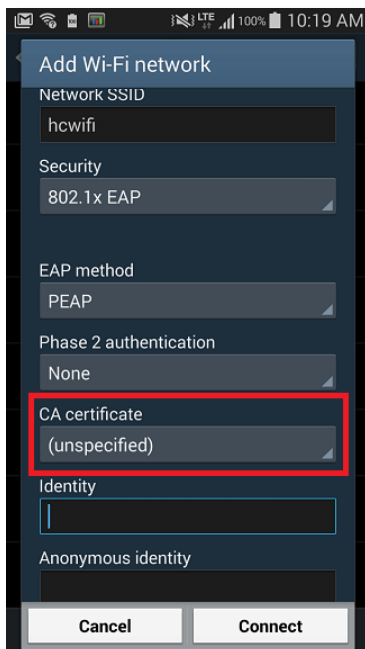

1. Open your Android Wi-Fi utility

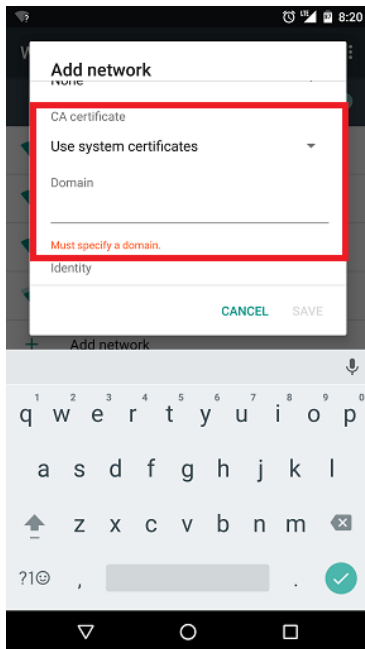

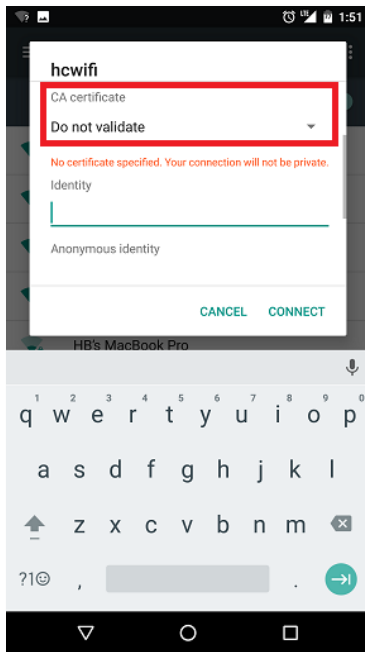

2. Select the **hcwif** wireless network

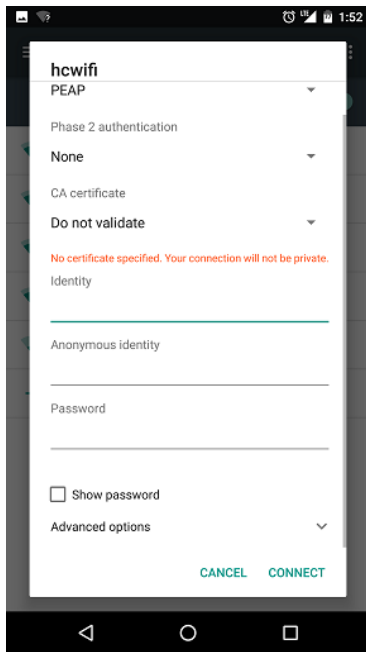

3. Leave **Security**, **EAP method** and **Phase 2 authentication** as their defaults (**802.1x EAP**, **PEAP** and **None** respectively)
4. If **CA certificate** is set to (**unspecified**), leave it as is

5. If **CA certificate** prompts you to select, choose either **Do not validate** or **Use system certificates**. If you choose the second option, enter **hollandcollege.com** as the domain.

6. Enter your Holland College username in **Identity** and your password in **Password**, leaving **Anonymous identity** blank

7. Click **Connect**
